Dialog Map (Lab 3): user interface navigation

Signed in (app shell)
nav(Home ! Discover ! My sessions ! Wallet ! Groups ! Settings) reaches each top-level screen from any state in this region
any protected screen [signed out] / redirect(/login?next=screen)
addEmail()[no email] / open Email Address (shell prompt; an address is required, confirming it is not)

Format: event(arguments)[guard]/action ! solid dot = start ! bullseye = end ! divider separates state name from entry/do actions and internal transitions ! **dashed = planned screen** (API on main, UI not yet built)
